Part of Requirement not completed/implemented in the project

1> Add/ Drop Course: In the project we have not implemented the feature for students to add or drop their courses as it requires another set of systems to be implemented to keep a validation check on the courses enrolled by the user.

2> Generate Fees Receipts: We have not added the functionality to generate fees receipts as it requires a payment management system.

3> Generate Transcripts: We have not added the functionality for the students to generate transcript reports as it requires an extensive dataset and a different mechanism.

4> Add/ drop students: In the Admin functionality, we have not added the feature to add/drop students or faculty and this has to be done manually in the database.
